Education

Corporate Institute of Science and Technology (RGPV)

Expected July 2024

Bhopal, Madhya Pradesh

Bachelor of Technology in computer science and Engineering (CGPA:8.54 / 10.00)

Training and Course

NPTEL

October 2022 - November 2022

Soft Skill

Bhopal, Madhya Pradesh

- Successfully finished a comprehensive soft skills training program provided by NPTEL, showcasing dedication to personal and professional growth.
- Enhanced communication, teamwork, leadership, and interpersonal skills through the comprehensive training curriculum.
- Developed adaptability and problem-solving abilities, vital for navigating diverse work environments effectively.

Programming in C++

July 2023 - October 2023

Bhopal, Madhya Pradesh

- Completed the "Programming in C++" training program offered by NPTEL, showcasing proficiency in C++ programming fundamentals and advanced concepts.
- Acquired comprehensive knowledge of C++ language syntax, data structures, algorithms, and object-oriented programming principles through NPTEL's rigorous curriculum.
- Demonstrated practical application of C++ concepts by successfully completing coding assignments, projects, and assessments as part of the NPTEL training program.

Programming in JAVA

Expected May 2024

Bhopal, Madhya Pradesh

- Acquired strong expertise in Java programming language, including object-oriented programming, data structures, algorithms, and problem-solving methodologies.
- Acquired strong expertise in Java programming language, including object-oriented programming, data structures, algorithms, and problem-solving methodologies.
- Familiarity with essential Java development tools and frameworks such as Eclipse, IntelliJ IDEA, Spring Framework, and Hibernate, enhancing productivity and facilitating collaborative development.

TechSimPlus

Browser Automation & Image Processing with Python

October 2023 - November 2023

Bhopal, Madhya Pradesh

- Developed Python scripts to streamline repetitive tasks and improve workflow efficiency, leveraging libraries such as Selenium for browser automation.
- Gained knowledge and skills in utilizing Python libraries such as OpenCV and Pillow for image processing tasks, including image manipulation, enhancement, filtering, object detection, and recognition.

Projects

Service Sprinter | HTML, CSS, Tailwind, JavaScript, React.js, Node.js, Express.js

- "Service Sprinter" - Developed a full-stack web application leveraging the MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Created a dynamic and responsive platform aimed at facilitating service requests and management, demonstrating proficiency in building scalable and efficient web applications.
- Utilized MongoDB as the database to store and manage data, Express.js for building the server-side application logic, React.js for developing the user interface components, and Node.js for the backend server environment.

Technical Skills

Languages: C, C++, Python, JavaScript, Java

Technologies: React.js, Angular, HTML, CSS, Tailwind, Django, Express.js, Node.js

Concepts: Compiler, Operating System, DBMS, Encryption, Decryption, Artificial Intelligence, Machine Learning, Neural Networks, API, Database Normalization, Agile Methodology, Cloud Computing
